

ENTOMOLOGY

AT THE UNIVERSITY OF CALIFORNIA, RIVERSIDE

ENTOMOLOGY.UCR.EDU

A GLOBAL CENTER FOR SCHOLARSHIP

- One of the world's highest ranked entomology programs, taught by distinguished faculty conducting pioneering research in the field.
- A home base for local and international projects with global ramifications — tackling questions and challenges of basic and applied science, including issues revolving around agriculture, human and animal health, natural and urban ecosystems.
- A superb launching point for work in molecular biology, physiology, ecology, evolutionary biology, biodiversity science, genetics, and pest management.
- Develop a unique set of tools during your graduate studies that will prepare you for a successful career in the life sciences and related fields.

ASSOCIATED CENTERS

The Entomology Program awards M.S. and Ph.D. degrees and enables students to leverage our renowned associated centers including:

- Entomology Research Museum
- Center for Integrative Biological Collections
- Center for Invasive Species Research
- Center for Integrative Bee Research
- Center for Conservation Biology
- UC Natural Reserve System
- Center for Infectious Disease and Vector Research
- Pacific Southwest Center of Excellence in Vector-Borne Diseases
- The California Agriculture and Food Enterprise

FINANCIAL AND GRANT SUPPORT

All admitted Ph.D. students receive funding through fellowships, teaching assistantships, research assistantships, or external fellowships.
