

**EARTH & PLANETARY
SCIENCES**
**AT THE UNIVERSITY OF
CALIFORNIA, RIVERSIDE**

EPSCLUGR.EDU

A PERFECT LOCATION

- Research the dynamic nature of the Earth and other planets using a wide variety of data from geological locations and NASA missions
- Collaborate closely with faculty investigating planetary processes operating at a wide range of spatial and temporal scales
- Unique Geology Education Outreach Program provides graduate students the opportunity to participate in active discussions in and out of the classroom with local k-12 students
- Launching point for careers in academia, industry, and government

DEGREES

The Earth Sciences Graduate Program awards M.S. and Ph.D. degrees with a focus on the following areas:

- Astrobiology
- Earthquake Process and Geophysics
- Global Climate and Environmental Change
- Astrobiology, Planetary and Exoplanetary Science
- Organic and Paleoenvironmental Evolution

FINANCIAL AND GRANT SUPPORT

All graduate students receive tuition waivers, health insurance coverage, and stipends through fellowships, graduate student research positions, and teaching assistantships.
