

A student with a backpack is walking away from the camera down a hallway. On the left, a brick wall has the word 'STATISTICS' mounted on it in large, white, 3D letters. The hallway has white walls and a dark floor. The lighting is bright, coming from the end of the hallway.

STATISTICS

AT THE UNIVERSITY OF
CALIFORNIA, RIVERSIDE

STATISTICS.UCR.EDU

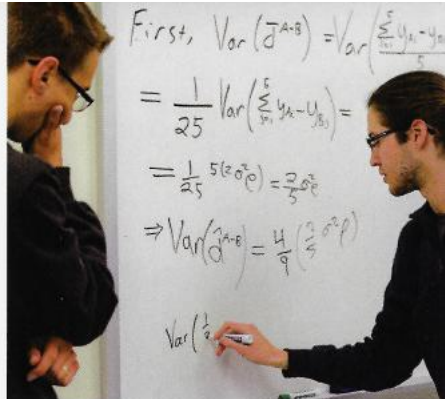

EMPHASIZING APPLICATIONS AND APPLYING THEORY FOR A BETTER WORLD

- The only program in Southern California offering a Ph.D. in Applied Statistics!
- A training ground for next-generation leaders in the field, who are mentored by internationally recognized faculty
- An opportunity to build expertise in the design of experiments, statistical inference, hypothesis testing and data modeling through our singular Statistical Consulting Collaboratory.
- A launching point for careers in academia and industry, from UC Riverside and John Hopkins University to the FDA, Pfizer, Google, Intel, Apple, Microsoft, Johnson & Johnson, Warner Bros., just to name a few.

DEGREES

The Statistics Program awards M.S. and Ph.D. degrees and enables you to diversify your study in a variety of research areas and disciplines:

- Government and Public Policy
- Industry
- Medicine
- Virtually Every Branch of Science

FINANCIAL AND GRANT SUPPORT

Most admitted Ph.D. students are financially supported through fellowship, teaching and research assistantships, and external fellowships.
